

HOW TO CREATE/EDIT INSTAGRAM PUZZLE?

1. **Open** .psd file in Photoshop;
2. The file should have such grids (if you don't have it, press Ctrl+H for Windows or Command+H for Mac):

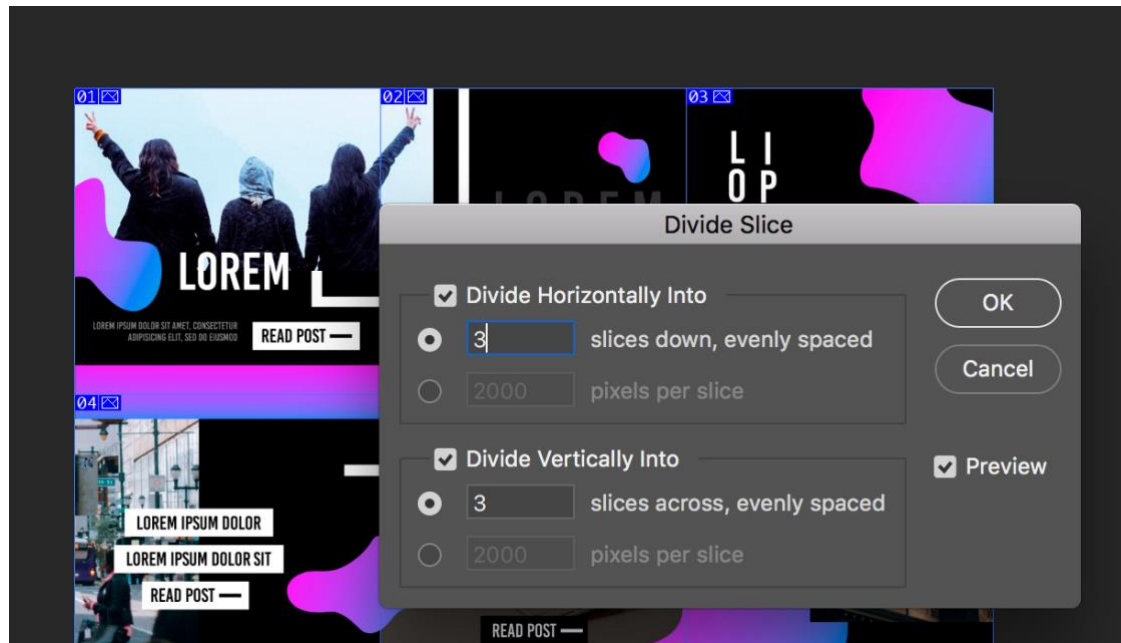

3. **Customize** your file;
4. After all customizations select “**Slice Tool**” on the left bar:

5. Make **right click** on your canvas and choose “**Divide Slice...**”;

6. In the opened window enter this values and press OK:

7. Now you can save each part of canvas in .jpeg for Instagram (the program will automatically create the folder named “images”, where all 9 pictures for posts will be);

8. Go to “**File**” - “**Export**” - “**Save for Web..**” - “**Save..**” - **Select the path** where the “images” folder will be created – “**Save**”.

9. Ready.
